

WHY TAP BEER

At Old Town Pour House, we believe in presenting our vast selection in arguably its purest form. Pouring from a tap not only reminds us of beer's rich history, but it also preserves all the flavor, notes and aroma intended by the brewmaster. Barrels are also not susceptible to light infiltration, a very common problem with bottles that breweries go to great lengths to combat. Furthermore, keg beer produces very little waste, making it the eco-friendly choice for beer drinkers with a conscience. However, the biggest advantage of having all our delicious beers on tap is that we can offer a variety of tasting options giving us maximum flexibility to explore seasonal and regional varieties, different types of food pairings, as well as offer a wide range of styles and brewing techniques that enhance the experience of casual drinkers and beer enthusiasts alike.

THE WORLD'S NECTAR

We view beer as a staple of life. Our love for this sweet nectar connects us to our collective past and gives us hope for a warm future. Enjoyed over the centuries by kings and peasants alike, some credit the importance of beer in early societies with the need to work as a community to grow grain, and it can be argued that the thirst for beer ushered in the birth of civilization itself.

Throughout history, beer has fortified the hearts of men on the field of battle and sloshed in the bellies of ships charting unknown seas. It has been carried to the ends of empires and has been lauded by revolutionaries, statesmen and poets. The ancient Egyptians believed that the mouth of a perfectly happy man is filled with beer. Who are we to argue? The Czechs decried that any government that raised the price of beer was doomed to fail, and we say that's sound governing. Frederick the Great cried "my people must drink beer" and Shakespeare wrote that "a quart of ale is a dish for a king." Whatever your take on beer, you'll undoubtedly agree that it is a libation with which to embrace life.

At Pour House, we give it center stage and ask that you join us in our admiration of this elixir of life. We offer a daily homage to beer, complimented by great food, fine service and a beautiful setting. We may not be as ardent as Homer Simpson, who said, "I would kill every man in this room for a drop of sweet beer," but we do agree that no one ever sits down to solve the world's problems over a glass of white wine!

So, in the great people's tradition of beer, we give you the Old Town Pour House. We ask that you grab a glass and fully embrace this libation's full flavor and rich history. We implore you to sit, relax and replenish your soul with good beer, great friends, and a toast to living life to the fullest...

BEER 6

INDEPENDENT LAGERS, LIGHTER TO DARKER

With ales dominating most craft beer lists due to the large range of styles available, lager brewing still accounts for the most volume of beer consumed worldwide. With all beer falling into two main categories: ales and lagers. The latter is fermented at lower temperatures for longer periods of time, creating clean flavors. Proper all-malted barley lagers are very difficult and expensive to brew, with nothing to hide behind due to their naked profile of flavors. Enjoy one of these clean, impeccably-made lagers below and you will realize that this category of beer has reason to be visited regularly.
