

Ice Driving In Sweden

Usually an experience reserved for the Top Gear team, you will have the chance to drive some of the best road vehicles in one of the most exclusive and captivating settings money can buy. This escape provides the opportunity to master your driving skills in a variety of Porsche 911's and Audi Quattro's with studded tyres that will enable you to push the car to the limit and drift sideways across a frozen lake. Your escape will include snow mobile excursions to some of the highest points of Sweden's mountainous landscape where you can catch a glimpse of the northern lights and embrace the wilderness in its most isolated form.

From arrival to departure you will receive first class hospitality in a purpose designed lodge which boasts a relaxation area and outdoor Jacuzzi offering you complimentary use throughout your stay. The lodge restaurant offers exceptional dining with views over the valley and a menu offering both Swedish and local specialities such as Moose, Deer and Trout.

You will also have the opportunity to film your own Top Gear lap using a helicopter and camera crew so you will be able to relive the experience for years to come.

Dates: January – March
