

ABOUT OUR NAME

The carbon arc lamp produces light by an electric arc. In the late 19th century it was used in movie projectors to illuminate silver screens.

The Illinois Department of Health advises that eating raw or undercooked meat, poultry, eggs, or seafood poses a health risk to everyone, but especially to the elderly, young children under the age of 4, pregnant women, and other highly susceptible individuals with compromised immune systems. Thorough cooking of such animal foods reduces the risk of illness. For further information, contact your physician or public health department.
